

ADHD Shared Care Prescribing

We are no longer initiating private shared care prescribing for all conditions including ADHD. We have made this decision following a review of our procedures, in order to bring them in line with the guidance provided by our commissioning body, the Buckinghamshire, Oxfordshire and Berkshire West Integrated Care Board.

For patients who are currently receiving medication under private shared care agreements, we will continue, but that process is under review.

We will, continue to prescribe for patients who have shared care agreements with NHS-approved providers, agreed through the Right to Choose pathway.
